EDUCATION

Northeastern University

Sept. 2021 - May 2025

B.S. in Computer Science, Overall GPA: 3.95 / 4.00

Boston, MA

Coursework

Compiler Design, Networks & Distributed Systems, Advanced Algorithms

Software Development, Computer Systems, Programming Languages

EXPERIENCE

Databricks

Present

Incoming Software Engineer

Bellevue, WA

Datadog

Sept. 2024 - Dec. 2024

Software Engineer Intern

New York, NY

- Designed Change Data Capture system for new internal Cloud Resource Manager in **Go**, increasing discoverability of **10000+** network infrastructure resources such as load balancers and DNS records.
- Upgraded **React** UI to allow free text and regex searching, backed by **Elasticsearch** cluster, replicated from **DynamoDB** using a custom connector.

Databricks

May 2024 - Aug. 2024

Software Engineer Intern

Bellevue, WA

- Spearheaded live testing for Databricks company-wide billing pipeline in **Scala** and **Apache Spark**, reducing component integration test cost by **92%** and saving **\$3000+** dollars within 3 weeks.
- Built billing test framework in **Scala**, improving dev velocity from start to deployment by **10+ hours**.
- Targeted complex testing scenarios such as chaos testing, load testing, and automated alert testing.

MathWorks

Jan. 2024 - Apr. 2024

Software Engineer Intern

Natick, MA

- Enhanced **C++** fixed-point operations in MATLAB to build full precision dot product and matrix multiplication APIs for embedded targets.
- Optimized SimuLink **C codegen** by selecting **50% smaller types** for neural net matrix operations.

Amazon

May 2023 - Aug. 2023

Software Engineer Intern

Seattle, WA

- Designed new service to generate risk-based disbursement policies for **9.7+ million** Amazon.com sellers, saving **\$600k+** dollars from bad actors while **reducing** seller friction.
- Implemented path-critical functionality for reserves, auditing, and disbursement service re-architecture effort with **AWS**, **TypeScript**, and **Java** to provide low-latency seller statistics.
- Created architecture to process **4.9 million+** seller risk signals daily with **Lambda** and **Kinesis**.

PROJECTS

x64 Compiler

Jan. 2024 - Apr. 2024

- Designed a dynamically-typed language compiler in **OCaml** targeting **x86_64** with a **C runtime**.
- Supported features such as first-class functions, native continuations, exceptions, and Cheney's semi-space garbage collection algorithm.

TECHNICAL SKILLS

Programming Languages

Java, Python, C/C++, TypeScript, Racket, Golang

Frameworks & Technologies

Kubernetes, AWS, React, Docker, Git, Vim
